# Testimonials

**“Career Bootcamp gave a great opportunity for our organization to showcase our services and connect with other service providers and international talents. The event was very well organized and showed how Espoo Talent Hub works with high professional competence and commitment to support international talents' career opportunities.”**

**“The City of Espoo truly shows that it cares for the international talents and wish to help them in their integration process. I warmly recommend both international talents and service providers to take part in future Career Bootcamp events!”**

**“I was truly impressed by the energy and enthusiasm of the participants. The event brought together a diverse group of individuals eager to learn, network, and make a real impact in their professional lives. The interactive workshops and discussions provided a fantastic platform for sharing insights, and the level of engagement from the audience was remarkable.”**

**“It's such a very insightful event with lots of valuable take-away nuggets that assist international professionals integration and well being in Finland. Thank you! 😊”**

**“To participate in this event I spent two nights, one by one, travelling by bus and it was totally worth it. I met people with similar problems and wishes, realized that getting job isn't piece of cake here, but I'm not alone on that way. In Finland there are a lot of helpful services, you just need to know about them and this event definitely helpful in it. I got some useful tips and new ideas thanks to organizers, who were so kind to share it and seriously answered on my silly questions. If someone asked me what is good to do when you feel tired and hopeless with no job or company to speak I'd definitely point to this event.”**

**“I love to attend the Career Bootcamp. The organisation was great, facilitating was great. I recommend the event for the people who is new to Finland, and also the one who have been here longer and still searching for jobs or want to change your career path.”**
